Reasons for Allowance

The amendment filed March 24, 2005 has been entered.

The information regarding the cultivar Jacarque was described in the South African Plant Breeder's Right application number PT 3290 filed on July 15, 2001 and published on August 31, 2001, more than one year prior to the filing of this instant plant application. The printed publication was accessible to the public more than one year prior to the filing date of this instant application. A publication relied upon as prior art under 35 USC 102(b) must be enabling. The text of the relied upon publications standing alone would not enable one skilled in the art to practice the claimed invention.

When the claim is drawn to a plant, the reference, combined with knowledge in the prior art, must enable one of ordinary skill in the art to obtain or reproduce the plant. See *In re Le Grice*, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could obtain and reproduce the plant from a publicly available source, then a publication describing the plant would have an enabling disclosure.

Applicant states that the claimed plant was not sold anywhere in the world, more than one year prior to the filing of this instant plant application. The catalog offering the instant plant for sale was first distributed in the U.S. in June 2003 and the instant plant was sold in South Africa in August 2003, less than one year prior to the filing of this instant application (page 2 of remarks filed January 24, 2005). The printed publication cannot be enabled because the disclosed cultivar has not been propagated or obtained from publicly available materials.

The specification provides as complete a botanical description as reasonably possible of the claimed plant. The completeness of the description is sufficient to distinguish this new plant from the prior art.
